

Jovelyn T. Comaingking

Senior Software Engineer · .NET, Full-Stack & Flutter Developer

Cebu, Philippines · Open to remote work · +63 922 424 4309 · netdev98@gmail.com · jovelyncomaingking.net

Summary

Senior .NET engineer with 7+ years of professional experience building RESTful web APIs, web applications and Flutter mobile apps, plus freelance full-stack work since 2018. I have built and maintained 85+ production web APIs in C# and ASP.NET Core across inventory, production, purchasing, e-wallet and e-learning systems. I ship complete products end to end: my own app, Wandr, is live on Google Play. Fluent with Claude AI and Microsoft Power Automate. Comfortable working remotely and independently with international teams, with CI/CD on Azure DevOps and a Microsoft Azure Fundamentals (AZ-900) certification.

Core Skills

- **Back end:** C#, .NET Core Web API, ASP.NET MVC, Blazor Server, Python, RESTful API design, microservices, OAuth authentication
- **Mobile:** Flutter & Dart, Android, Firebase, Google Play Billing
- **Front end:** HTML & CSS, JavaScript & jQuery, responsive design
- **Databases:** SQL Server, PostgreSQL, Oracle, Firebase / Firestore
- **DevOps & tools:** Azure DevOps CI/CD, Git, Postman, Visual Studio, VS Code
- **AI & automation:** fluent with Claude AI for building and coding, Claude AI (Anthropic API) integration, Microsoft Power Automate workflows, Google APIs
- **Integrations:** CRM and system integrations, Python integration services, third-party REST integrations
- **Design & web:** UI/UX in Figma and Adobe XD, wireframing and prototyping, WordPress development
- **Ways of working:** Agile, code reviews, reusable code libraries, well-tested code

Work Experience

Senior Software Engineer —ROMTech, Remote · Jun 2026– Present

- Own back-end development for a US company's core systems, focused on the SQL Server database layer.
- Build and maintain integrations between the company's CRM platform and its internal systems.
- Develop and maintain the master integration service, written in Python, that connects the company's platforms.

Senior Software Engineer (Sr. App Development Analyst) — Accenture, Cebu City · Jul 2023 – 2026

- Built and maintained new and existing software features, delivering well-tested code across several technologies.
- Helped establish an Agile development process that improved team collaboration and shortened development cycles.
- Contributed to a structured SDLC process that reduced average development time.

Software Engineer — Cebu Mitsumi (Japanese manufacturer), Cebu City · Sep 2022 – Jun 2023

- Designed and developed web APIs for suit traceability across production.
- Built REST APIs with OAuth authentication to expose data securely to client applications.
- Built and maintained shared code libraries that kept the team's code consistent and reliable.
- Developed a scalable, high-availability web application and automated scripts that cut repetitive manual work.

Software Developer — RD Pawnshop Inc., Banilad, Cebu City · Jul 2019 – Sep 2022

- Created and maintained APIs for the company's web, mobile, purchasing and e-wallet systems.
- Set up a CI/CD pipeline that reduced time-to-deployment from days to hours.
- Implemented automated monitoring and alerting to find and fix system issues quickly.
- Built a secure authentication system that reduced account hacking attempts.

Freelance Full-Stack & Mobile Developer — Remote · 2018 – Present

- Deliver web, mobile and API projects for clients end to end, from UI/UX design to deployment (see Selected Projects).

- Built RESTful APIs for seamless integration with other applications, with responsive front ends and secure authentication.
- Designed the wireframes and mockups in Figma and built the Nova Capital Consulting website in WordPress.

API delivery highlights (2018–2024): 85+ production web APIs in C# / .NET — 15+ for an external mobile app's CRUD operations, 20+ for a production website and inventory system, 16+ for purchasing and e-wallet websites, 24 for a learner module and 12 for an assessor module.

Selected Projects

Project	What it does	Stack
Wandr — live on Google Play	DIY travel planner for the Philippines that I designed, built and published solo: AI-generated itineraries, expense splitting between travel companions, and a visa checker	Flutter, Dart, Firebase, Claude AI (Anthropic API)
Dental Clinic System	Patient records, appointments and billing on mobile and web	Flutter, ASP.NET, SQL Server
Rent-a-Car Platform	Real-time booking, driver assignment and fleet management	Flutter, .NET Web API
Mobile Booking System	Booking app backed by a custom API	Flutter, C# API, SQL Server
Pharmacy Management System	Pharmacy operations web application	ASP.NET, C# API
Kiosk / POS System	Self-service ordering, inventory and sales reporting	.NET, C#, Oracle
Management System	Enterprise operations and employee records with CI/CD	ASP.NET, PostgreSQL, Azure DevOps
Nova Capital Consulting website	Designed the wireframes and mockups in Figma, then built the live company website in WordPress	Figma, WordPress
